## Cemento 14

**Cemento 14 è la prima collezione non ceramica di 14oraitaliana.**

**Cemento 14 è un prodotto vivo e naturale in cui i segni e imperfezioni come spillature e differenze di tono, non sono da considerarsi difetti ma elementi distintivi che esaltano la bellezza del materiale contraddistinguendolo da prodotti di produzione industriale.**

**Cemento 14 è una matrice su cui il tempo lascia le proprie tracce e che muta con il trascorrere delle stagioni.**

**Ottenuto dalla frantumazione di pietre e nel rispetto delle norme sull'ambiente, Cemento 14 consta di finissime polveri mescolate a materie naturali e unite con cellulosa e acqua.**

**La fase produttiva ha eliminato la cottura delle materie, garantendo l'assenza di emissioni di CO<sup>2</sup>**

Natural material. Real cement, pre-cut in full body.

CEMENTO 14 is a natural and living product, hence the imperfections which one may encounter, as splash marks, differences in color tones, are not to be considered as defects but as distinctive elements that enhance the beauty and distinguish it from industrial products.

Cemento 14 must be seen as a "matrix" where time leaves its traces and that changes as time goes by.

It is made up from crushed and pulverized stones with a manufacturing process that guarantee an absolute respect of nature.

The fine powder is then mixed with other natural materials and binded together with the use of cellulose and water. During the production process, the firing of the product has been eliminated guaranteeing zero emission of CO<sup>2</sup>.
